EDUCATION

BTech in Computer Science With Information Technology,
SRM Institute Of Science & Technology
CGPA - 9.01

2026 | Chennai, India

Class 12th, Krishna Public School

2022 | Bhilai, India

Class 10th, Krishna Public School

2020 | Bhilai, India

PROFESSIONAL EXPERIENCE

Apple & Infosys iOS Student Developer, SRM University 📍

August 2024 – May 2025

- Collaborating with industry experts from Apple and Infosys to enhance development skills and adhere to best practices in iOS app development.
- Leading the design and development of **NoteShare**, an innovative iOS application for students to seamlessly share, organize, and access handwritten notes with effortless AI-driven features.
- Aiming to increase user engagement by approximately 60%, as evidenced by similar applications.

iOS Developer Intern, Infosys

April 2025 – May 2025 | Mysore

- Developed and deployed core features of a Hospital Management System iOS app using **Swift**, **UIKit**, and **Core Data**, enabling efficient patient registration, appointment booking, and record access.
- Implemented secure **role-based authentication** and optimized UI/UX for **iPhone**, ensuring seamless, privacy-compliant interaction for doctors and patients.

SKILLS

Programming Language

Python, C++, Swift, Mysql, Html/Css

Tools/Frameworks

AWS Cloud, FireBase, UIKit & SwiftUI, BeautifulSoup, Pandas, NumPy, Git

PROJECTS

NoteShare 📍

- Developing **Noteshare**, an iOS application enabling students to upload, share, organize, and access handwritten notes seamlessly, fostering collaboration and simplifying study workflows.
- Leading end-to-end development in **Swift**, including UI/UX design, feature implementation, testing, and optimization for a user-centric, efficient app experience.

Price Comparision Website 📍

- Created a website to scrape real-time data from multiple websites for current item/device prices.
- Used Python's BeautifulSoup and Requests libraries for data scraping and MySQL to store links and price class names.

Inventory Management System 📍

- Developed a web-based system for efficient product tracking and stock management.
- Key features include real-time inventory updates, a user-friendly dashboard, and secure backend.

AWARDS & ACHIVEMENTS

National-Level Smart India Hackathon 2024 📍

Ranked among the Top 10 teams in SRM's Internal Hackathon round with an innovative AI-powered solution

Grand Finalist at Navonmesh '24 National Level Hackathon 📍

Selected among 29 teams from 1550+ national entries at SSIPMT Raipur, gaining valuable insights from esteemed judges, including **Nitin Sharma (India Head, Qualcomm)** and **Hridesht Singhal (CEO, Hyderabad)**.

Zscaler Certified, Zscaler Zero Trust Associate (ZTCA) Certification 📍

Oracle Certified, Cloud Infrastructure 2024 Foundations Associate 📍

Fortinet Certified, Associate in Cybersecurity 📍

NPTEL Certified, Computer Architecture, Java 📍

Matlab Certified, Machine Learning, Deep Learning, Image Processing 📍

AICTE Certified, Google Android Development, AWS Cloud, Juniper Networking, PaloAlto CyberSecurity, Zscaler Cloud 📍
